

Testimonials

"Duncan was an impressive operator. He excelled in the areas of relationship management and his agility in responding to the scope of the works that changed regularly - another key capability he brought to the role. He was a pleasure to work with and a great representative of your organisation. If an opportunity presents itself I would not hesitate to re-engage his services."

Deputy Commissioner, NSW SES

"What we liked about Performance Drivers was their "Grey Haired Guru"™ philosophy which enabled us to take advantage of the broader experience in areas outside the ERP project. We gained many different ideas, including different ways of looking at our challenges. Performance Drivers took the time to understand our current customers and our target industries to ensure processes were designed with a long term view. We would take advantage of their "Grey Haired Gurus"™ again and are happy to recommend them."

General Manager, Skyzer Technologies

"When I approached Performance Drivers my initial thoughts were to secure a couple of "Grey Haired Gurus"™ with commercial banking experience to work within our existing team. Your suggestion that Performance Drivers manage the entire task force on our behalf proved to be of great value. I also greatly appreciated the flexibility of the Performance Drivers approach. It was a great relief to know that we could reduce the team sizes or shorten the project length without incurring penalties."

General Manager, Finance & Operations, St George Bank

"Our team enjoyed working with George immensely and he freely shared his knowledge across the project which allowed him to gain the respect of the designers and manufacturers in the project. Overall, it was a positive and beneficial experience for UGL. I am happy to recommend George and Performance Drivers, and/ or utilise George and your organisation again if the situation arises."
